

Nabeel Thurakkal

Senior Frontend developer | BI Deutsch

Ulm, Germany | +49 15221542802 | nabeel.thurakkal92@gmail.com

Objective

Experienced frontend Developer | 8+ Years in Scalable Web Solutions | React, TypeScript, HTML5 and CSS3 | Design system | Available to join immediately | Ex-QuillBot | Ex-Cleartrip

Professional experience - Highlights

- 8+ years of experience in designing, developing, and managing scalable and high-performance web applications.
- Expertise in React.js, specializing in building design systems and component libraries for scalable frontend architectures.
- Proven ability to promote frontend best practices through code reviews, performance optimization, testing (Jest, React Testing Library) and CI/CD pipelines.
- Strong experience implementing designs from Figma wireframes into pixel-perfect, responsive interfaces; experienced with data-intensive dashboards and interactive UI components.
- Hands-on experience with RESTful API consumption and API interface design, collaborating closely with backend engineers on efficient data contracts.
- Experience in developing SaaS products, AI-driven web applications, and highly responsive, user-centric interfaces.

Core Skills

React JS, React Redux, Vue JS, Context API, Next JS, Typescript, RESTful APIs, GraphQL, Node.js, PostgreSQL, Styled-components, Unit and end-to-end testing, Design system, Storybook, HTML5, CSS3, Javascript (ES6+), jQuery, Jest, Git, Datadog, Scrum, CI/CD Pipelines, Github actions, Sass, Less, Emotion JS, Bootstrap, Responsive CSS, MDX, AJAX, Web accessibility.

Design system

Material UI, Ant design system.

Design tools

Figma, Sketch, adobe photoshop

Code editor

Visual studio code, Sublime text

Professional Journey

P19 GmbH - <https://www.ki-cockpit.com/> - Hybrid, Ulm, Germany (May 2025 - Present)

Senior Frontend Developer

- Created a comprehensive super admin dashboard from scratch using React, React Query, and React Context API, providing centralized administrative control and enhanced user management capabilities
- Developed and implemented the complete backend system using Node.js and TypeScript with PostgreSQL database, ensuring robust data management and API functionality to support the admin dashboard.
- Refactored the chat start page using React and React Query, improving user interface performance and data fetching efficiency.

QuillBot - <https://quillbot.com> - Remote (March 2022 - August 2024)

Senior Frontend Developer

- Developed and implemented a comprehensive **design system (StyleQ)** for QuillBot using **React JS and Typescript** ensuring **WCAG compliance**, which improved accessibility and user experience across all the platforms.
- Revamped all product pages (Paraphraser, Grammar checker, summarizer etc) in to the newly built DS, significantly **improving user experience, conversion rate, interface aesthetics** and hence **the revenue**.

- Experience running experiments or **A/B tests** using **Amplitude** to test product hypotheses.
- Created detailed documentation to support the design system using **storybook**, ensuring easy adoption and understanding for all team members.
- Developed an extensive **icon library (styleq-icons)**, enhancing the visual language and usability of QuillBot's interface.
- Refactored the Paraphraser Library, including writing custom React hooks, API integrations, performance optimization, code cleanup and improving code readability.
- Worked on **micro-frontend** migration of the web application with **React JS**, specifically migrated Logging/signup pages, Accounts pages, Premium and upgrade pages.
- Developed and implemented **sales popups** and banners across the **platform**, contributing to targeted **marketing campaigns** and user engagement.

Cleartrip - <https://www.cleartrip.com/> (August 2018 - March 2022)
Senior UI Engineer

- **Bento (Design system)** - <https://ctbento-v1.netlify.app/>
 Developed new component library of cleartrip from scratch using React JS, SCSS, Gatsby and Storybook.
- **Cleartrip flights**
 Worked on frontend revamp and code refactor of of flight division of cleartrip using React JS and newly built design system Bento.
- **Cleartrip mobile PWA (live)** - www.cleartrip.com/m/hotels
 Worked on creating UI components for all hotel booking pages using React and styled-components.
- **Cleartrip hotels** - www.cleartrip.com/hotels
 Migrated cleartrip hotels home pages and hotel details page in to pwa desktop.

QBurst technologies (November 2014 - July 2018)
Senior frontend engineer

- **Millicom TIGO (live)** - www.tigo.com.co
 Worked on maintenance of the application, worked on the validation feature and popup components. Application is built by using React js and node js.
- **SPOT M3**
 The application is built by React native + clojure script. Worked on the push notification feature and maintenance of the App and delivered both ios and android build in very less period of time.

Open source contribution

Stormbreaker (react, emotion) - <https://stormbreaker-v2.netlify.app/>
 Built M.I.T licensed component library code named storm breaker using React JS, Emotion Js.

Education

University	Professional degree
Cochin university of science and technology	BTECH - Electronics and communication engineering
College	Year
Govt. Model engineering college, Kerala, India	2010 - 2014

Languages

English

Deutsch - B1

Interests

Badminton enthusiast, Footballer, Cricketer, Travel
